

Average residential solar power system in san antonio

How much do solar panels cost in San Antonio?

As of Jan 2024, the average cost of solar panels in San Antonio is \$2.72 per watt making a typical 6000 watt (6 kW) solar system \$11,439 after claiming the 30% federal solar tax credit now available. This is lower than the average price of residential solar power systems across the United States which is currently \$3.00 per watt.

How much does a 5 kW solar system cost in San Antonio?

While a 5 kW system will only cost you \$10,751 in San Antonio, TX, doubling the system size effectively doubles the price, so you'll pay about twice that for a 10 kW system. The higher the price tag, though, the more you'll get back as a credit towards your federal tax bill. Are solar panels worth it in San Antonio, TX?

What is the best solar tax credit for San Antonio homeowners?

The federal solar tax credit is the best solar incentive available to San Antonio homeowners in 2023. The solar tax credit reduces what you owe in federal taxes by 30% of your solar installation costs for the year you install your system. It effectively saves you 30% on your solar costs.

How can I reduce my cost of solar in San Antonio?

Taking advantage of incentives and rebates and shopping around for quotes can bring down your cost of solar in San Antonio, TX. As long as your federal tax bill is high enough, you can take advantage of the federal tax credit in San Antonio, TX.

What is the average electricity rate in San Antonio TX?

The average electricity rate in San Antonio, TX in January 2025 is 11.41¢ per kWh. To satisfy the electricity consumption of a typical consumer in San Antonio, a solar system of 9 kW or more is necessary.

How much do solar panels cost?

This is lower than the average price of residential solar power systems across the United States which is currently \$3.00 per watt. The size of a solar panel system also plays a role in how much the installation will cost. Larger solar installations will typically have a lower cost per watt, because the panels can be purchased at a 'bulk price'.
