

What is a solo 433 power sprayer?

The SOLO 433 power sprayer achieves a maximum pressure of 30 bar, which means a long range can be achieved. You can therefore spray the agent efficiently even on higher areas, such as espaliered and standard trees and large shrubs.

What is the SOLO 441 Li backpack sprayer?

The SOLO 441Li is a robust and lightweight backpack sprayer designed for semi-professional use. It's perfect for contract gardeners, acreage owners, or hobby farmers. It can be used with various chemicals like liquid fertilizers, selective herbicides, fungicides, and insecticides.

Are solo backpack sprayers good?

SOLO backpack sprayers are the perfect aids for long applications over large areas. They are made of light but extremely solid material, are ergonomically shaped and thus offer maximum comfort during intensive work. Whether with a manual, battery-operated or power pump: they always impress with SOLO quality and high performance.

Which backpack sprayer is best?

The backpack sprayers with piston pump, such as the SOLO 425 and 435, are more suitable for applying thin spraying agents. The diaphragm pump models, on the other hand, like the SOLO 473 D and 475 backpack sprayers, are used mainly for thick, abrasive agents that are sprayed at low pressure.

What is the difference between a diaphragm pump and a backpack sprayer?

The diaphragm pump models, on the other hand, like the SOLO 473 D and 475 backpack sprayers, are used mainly for thick, abrasive agents that are sprayed at low pressure. If you want to work without any manual pumping, you should opt either for the 417 or 416 Li battery-operated backpack sprayers or the 433 power sprayer.

What is a solo 424 Nova?

The SOLO 424 NOVA, 425 Classic, 435 Classic, 473 D Classic and 475 Classic backpack sprayers have transparent, very strong, UV-resistant tanks with fill level marking and nominal capacities of 15 - 20 l. They are suitable for all liquid fertilisers and plant protection spray media, such as fungicides, herbicides and insecticides.
