

Does BASF use wind energy?

And we use wind energy ourselves at BASF: We have partnered with other companies to build one of the largest offshore wind farms in the world. Wind energy is widely recognized as a clean and renewable energy source. BASF performance materials help power up wind parks.

Does BASF have a solar park?

that BASF aims to reduce its greenhouse gas emissions by 25% by the year 2030 and achieve net-zero emissions by 2050. Replacing fossil-based electricity with renewable electricity is an important lever to further bring down emissions. ...that BASF owns a solar park in Germany? In 2022, BASF and Envision Energy inaugurated a solar power plant in Schwarzheide.

Does BASF have a power purchase agreement with CLP & Envision Energy?

BASF signs a power purchase agreement with CLP and Envision Energy. Image by BASF. The contract is a sleeved long-term PPA and involves CLP China as the power generation party and Envision Energy as the power retailer.

How can BASF help concentrating solar power plants?

More efficiency for concentrated solar power plants thanks to new BASF simulation tool. BASF has developed a new software solution to help with challenges at CSP plants.

What plastics does BASF offer for solar panels?

For the electronic components of these installations, BASF offers special grades of the engineering plastics Ultramid® (PA) and Ultradur® (PBT). Our experts will guide you to a solution customized to your needs! Come rain or shine, solar panels need to withstand all kinds of weather conditions.

Why should you choose BASF for PV technology?

PV technology has become an integral part of the worldwide energy mix, and will only grow in importance as time goes on. The standards for this technology are very high. And BASF is helping to advance PV even further - with reliable, intelligent and innovative chemical solutions.

Whether it's roof-mounted solar panels, smart meters, or systems to store energy, solar energy is reimagining what's possible in the home. BASF Engineering Composites is an integral part of ...

Solar Energy Advancements in technology have made solar energy more efficient and cost-effective than ever before. Solar panels are now installed on homes and businesses, large ...

BASF and X-ELIO have signed a 12-year Power Purchase Agreement (PPA) to supply 48 megawatts (MW) of solar power to BASF's Verbund site in Freeport, Texas. Read more; BASF ...

Furthermore, BASF has signed 25-year power purchase agreements (PPAs) with ENGIE and is trusted for the supply of significant amounts of renewable electricity from wind and ...

On January 1, 2025, BASF's Performance Materials division completely switched all its European sites to renewable electricity. "As BASF, we want to enable our customers green ...

In the highly dynamic world of electronic materials, you need more than a reliable and strong partner. We have been supplying electronic materials for more than 30 years. The experience ...

Wind power agreement at two Texas sites will add 35 MW to BASF's renewable energy supply; solar power at 55MW is the "cherry on top" Up to 90% of the [...]

BASF Environmental Catalyst and Metal Solutions (ECMS) today announced energy usage at its site in Fremont, California, is net-zero with the installation of 428 rooftop ...

Electricity from the desert "Solar thermal power plants concentrate sunlight to produce high temperatures. In sunny regions, they are thus able to deliver large quantities of environment ...

Die BASF Renewable Energy GmbH verantwortet die Beschaffung und den Handel mit Erneuerbaren Energien bei BASF. Wir sind Takt- und Ideengeber für die BASF auf ...

The renewable energy market in the United States has consistently been growing over the past decade. In fact, according to a 2021 report by the Environment America Research and Policy ...

Germany's BASF has entered into virtual power purchase agreements (VPPAs) for 250 MW wind and solar power. It aims to offset the carbon-intensive, grid-supplied electricity it uses at more...

With our knowledge and expertise in chemistry for oilfields, refineries, mining, water, wind and solar energy, we partner with customers and share their commitment to a healthier, more ...

Integrating transparent solar-harvesting systems into windows can provide renewable on-site energy supply without altering building aesthetics or imposing further design constraints.

BASF is committed to renewable energy solutions to power its sites across the United States and has entered into virtual power purchase agreements for wind and solar ...

Solar support with a proven track record . Advancements in technology and policy have made solar energy more efficient and more cost-effective than ever. Solar panels are now installed in ...

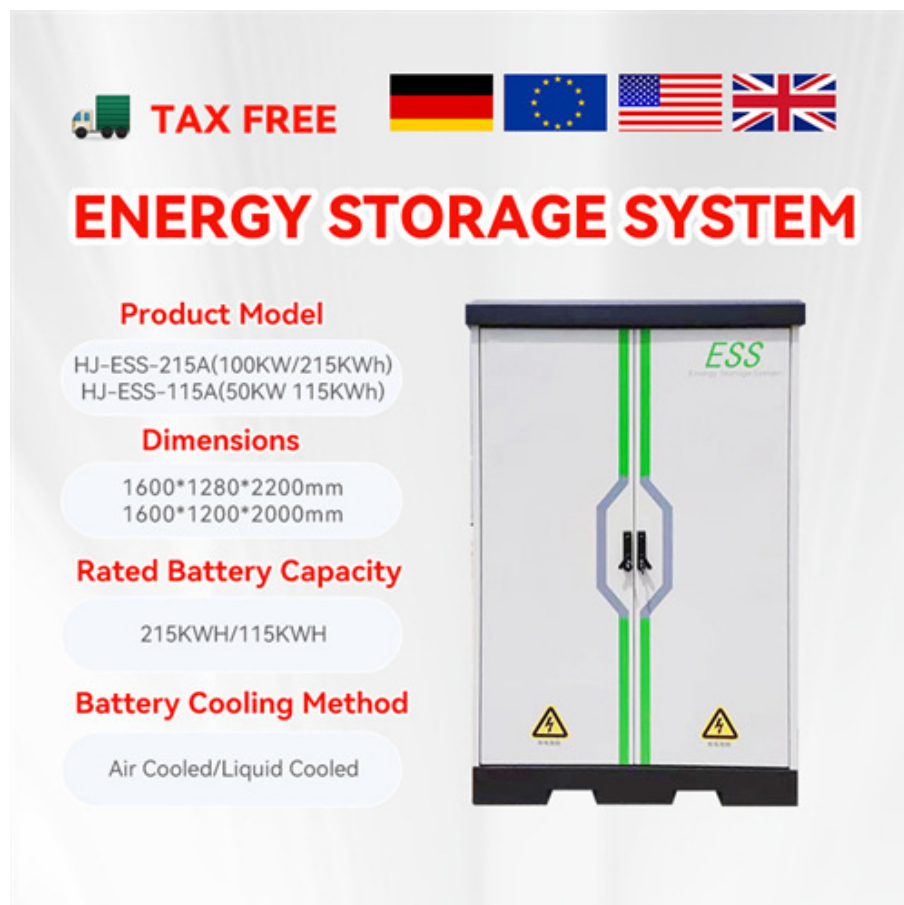

German chemicals group BASF SE (ETR:BAS) said it signed today a 10-year power purchase agreement (PPA) to procure renewable electricity for its three manufacturing ...

BASF and X-ELIO have signed a 12-year Power Purchase Agreement (PPA) to supply 48 megawatts of solar power to BASF's Verbund site in Freeport, Texas. With this ...

BASF is collaborating with EDF Energy North America to improve the energy balance and reduce CO2 emissions of two of its production sites in Texas. The companies ...

BASF is committed to renewable energy solutions to power its sites across the United States and has entered into virtual power purchase agreements (VPPAs) for wind and ...

ENERGY STORAGE SYSTEM

Product Model
HJ-ESS-215A(100KW/215KWh)
HJ-ESS-115A(50KW 115KWh)

Dimensions
1600*1280*2200mm
1600*1200*2000mm

Rated Battery Capacity
215KWH/115KWH

Battery Cooling Method
Air Cooled/Liquid Cooled
