

What is the capacity of the Bay Trail Solar Power Plant?

Once operational, the 74.9-MW facility will consist of approximately 197,000 tracking bifacial solar panels. Construction is underway at the Bay Trail Solar Power Plant, sited on 500 acres in Citrus County, Fla.

What is the Bay Ranch Solar Power Plant?

The Bay Ranch Solar Power Plant is a solar power plant that uses innovative double-sided panel design to track the movement of the sun. It will be built on 645 acres in Bay County, Fla., and will be capable of producing enough electricity to power approximately 23,000 average-sized homes at peak production.

Where can you get solar power in Florida?

Bay Trail Renewable Energy Center north of Crystal River. Duke Energy recently built 10 solar plants in Florida. "It's been interesting to watch the changes through the years," Carrico said. "This place is ever evolving, and you really must do that if you're going to sustain and stay abreast with the competition.

Why was the Crystal River power plant built?

When the first coal unit at the Crystal River power plant was built, it was the start of a cultural and economic change for the once-sleepy fishing and farming community. Florida Power Corp. selected the Crystal River site because it was close to the company's transmission system, water and a highway. Construction of unit 1 started in 1964.

Clearing activity for the Bay Trail Solar Power Plant is in progress and Duke will begin installation of the "racking system" (metal poles to support the solar panels) in July and solar panels in August, Duke spokeswoman Ana ...
