

What is Bell's Solar PV system?

Scheduled to be commissioned in Q1 2023, the solar PV system will replace a portion of Bell's electricity consumption with clean energy generated at Bell's Singapore facility. During its lifetime, Bell's solar PV system is expected to generate close to 40 GWh of clean energy, which will amount to a reduction of over 16 kilotons of CO2 emissions.

Who owns Bell Solar?

Bell Solar trades under the brand Sunboost, and is owned by National Solar Energy Group, which recently rescued the troubled Today Solar brand from administration. The company claims to be "largest solar panel retailer in Australia", having installed more than 39,000 installations nationally over the last four years.

Does Bell Singapore have a solar PV system?

During its lifetime, Bell's solar PV system is expected to generate close to 40 GWh of clean energy, which will amount to a reduction of over 16 kilotons of CO2 emissions. In addition, Cleantech Solar will also install two charging stations to support Bell Singapore employees who drive electric vehicles.
