

Benefits of solar power for homes in emmaus

What are the benefits of residential solar?

This clean energy source is making the electric grid more dependable while helping solar homeowners save money and improve the value of their homes. With all of this interest and so much information available, Energy Saver wants to take a moment to highlight five benefits of residential solar:

Why should you use solar power for your home?

Generating your own solar power can give you the freedom to keep the lights on if there's a disruption in power. Residential solar energy systems paired with battery storage--generally called solar-plus-storage systems--provide power regardless of the weather or the time of day without having to rely on backup power from the grid.

Is solar energy for residences a good idea?

Solar energy for residences is a hot topic, and rightfully so. The amount of solar connected to the electric grid has grown exponentially in the past several years, and there are now nearly 4 million American households that are already generating their own power with solar energy.

Is solar a good money-saving option?

Solar offers great potential to save money on your monthly utility bill, and with utility bills trending upward, solar is likely to remain a good money-saving option for years to come. The amount you save depends upon how much electricity you consume, the size of your solar energy system, and how much power it is able to generate.

Should you buy a solar energy system?

As battery technology improves and financial incentives for energy storage go into effect, deciding to invest in battery storage makes sense for more households across the nation. Buying a solar energy system will likely increase your home's value.

Is residential solar a good investment?

Residential solar is more affordable than ever, especially with the extension of the federal residential solar tax credit. Taxpayers can claim a 30% tax credit on the cost of solar systems on their income taxes. But be sure to install before January 1, 2033, when the tax credit is set to decrease to 26%.
