

Why are solar buyback plans so popular?

Solar buyback plans are popular because they are cost-effective and energy efficient. So, opting for one will help generate clean energy and allow you to get credit for the excess energy produced. Different companies are providing these plans to their customers with interesting offers.

What is a solar buyback rate?

Here are some key aspects to keep in mind: The buyback rate is when the electricity company credits you for the excess energy your solar panels generate. Compare different plans to find the one that offers the most competitive buyback rate. You'll want to know the rate the energy company charges you for the electricity you consume from the grid.

How do I choose the best solar buy-back company?

Before pinpointing the best company for the solar buy-back for your needs, you need to understand how the system works. Solar buy-back schemes, or Feed-In Tariffs (FiT), are incentives that reward you for the excess electricity your solar system produces and feeds back into the grid, paid per kilowatt-hour (kWh).

Is a solar buyback program necessary?

If you have a solar system installed in your household and produce excess energy during the daytime, solar buyback programs and plans can allow you to send that excess energy back and earn bill credits or cash.

How does solar buyback work?

They offer solar buyback plus and solar buyback select plans, both for a duration of 12 months. There is no credit sweep and the electricity is 100% renewable. The customer gets solar buyback credits at a lower export rate compared to the energy rate.

Does CPS Energy offer a solar buyback plan?

CPS Energy has a unique solar buyback plan that credits your solar energy generation at the same rate you pay for all solar energy, up to your usage level. The surplus electricity that you contribute to the grid is typically recognized and compensated at a reduced rate, often equivalent to the wholesale price of electricity. 2. Rhythm Energy
