

What is the cost of a solar panel?

The cost of a solar panel varies depending on its efficiency. Less efficient polycrystalline panels typically cost \$0.75 per watt, making a 400-watt panel around \$300. The cost also depends on the purchasing method. Buying through a full-service installer usually results in a lower price per panel compared to purchasing individually from a retail store.

Is a cheap solar panel worth it?

A cheap solar panel isn't worth anything if it breaks without a warranty to replace it. The cost of a solar panel is set by the manufacturer and involves a variety of factors, from cost of production to expected lifetime. Let's break down the factors that go into solar panel costs.

How to choose the best Cheap solar panels?

Price Point (20%): Naturally, the cost per watt is a crucial thing to look at when comparing the best cheap solar panels. Options with lower costs will undoubtedly help you keep your upfront costs down, which is the primary goal when prioritizing affordability.

What are the cheapest solar panels per watt?

At just \$2.36 per watt, AXITEC offers the cheapest solar panels per watt on our list. The German manufacturer offers average warranties and isn't a top performer in terms of performance or resiliency, but AXITEC panels can be a great way to go solar on a budget.

Where can I buy cheap solar panels?

If you're looking to buy cheap solar panels, we recommend looking at options from Q Cells and LONGi, in particular. These are both tier-one panel manufacturers that offer low prices, solid warranty coverage and above-average efficiency ratings for their products.

What is the cost of a 400 watt solar panel?

Today's premium monocrystalline solar panels typically cost between \$1 and \$1.50 per Watt, putting the price of a single 400-watt solar panel between \$400 and \$600, depending on how you buy it. Less efficient polycrystalline panels are typically cheaper at \$0.75 per watt, putting the price of a 400-watt panel at \$300.
