Top-rated - BLAVOR Solar 10,000mAh Portable Power Bank 5. Best budget option - YOESOID Portable Solar Power Bank Do solar phone chargers really work?

Are solar phone chargers a good idea?

Solar phone chargers are a great way to stay powered up on the go. They are portable, lightweight, and can be used to charge your phone or tablet. Whether you're an outdoor enthusiast or simply looking for an eco-friendly way to charge your devices, read our list of the best solar phone chargers and power banks.

Which solar charger should I buy?

If you just need a solar charger for your phone and mobile accessories, the BigBlue 3 28W is a good option. It's compact, lightweight, and pretty small once folded. As the name suggests, it can deliver up to 28W power and has three built-in USB-A ports. Remember, each USB-A can only offer up to 12W power.

Should you use a portable solar panel Charger?

Portable solar panel chargers are meant to function as a source of backup power, not as the primary way to charge your phone every day due to their slow charging speed. The quality and efficiency of solar-powered phone chargers are improving over time.

What is a solar phone charger?

Solar phone chargers are portable power banks with USB-A or USB-C outlets that can be used to charge your phone or other devices on the go with solar energy. These machines are popular with outdoor athletes, like hikers and backpackers, but they're also used by everyday individuals who want access to power wherever they are.

What devices can you charge with this solar charger?

This solar charger is a direct charger, so you will only be able to charge your phone (or other devices) while the panels are actively absorbing the sun. This charger comes with a USB-to-USB-C cable that can easily be switched out for any USB-to-whatever cable, though Apple products can be sticky.

We tested a few solar chargers that have DC power outputs, and these performed the best when hooked up to the DC power stations we used in our 100+ watt solar panels test. ...
