How much do solar panels cost in Brisbane?

Based on the data from February 2025 - the average cost of a typical 6.6kW solar panel system in Brisbane is \$5,210 after the STC rebate has been deducted.

Are solar panels a good investment in Brisbane?

With the sunny climate in Brisbane, harnessing the enormous solar energy is considered to be a great investment for minimizing electricity bills and also ensuring environmental sustainability. Be it commercial or residential, we offer the best deals on Solar Panels in Brisbane for various types of solar panels.

Are solar panels available in QLD?

Yes, some solar-specific products are on offer in QLD, however these deals are few and far between. Most larger companies, such as AGL and Origin, will generally have solar-specific plans available, but it normally requires certain conditions to be met, such as purchasing solar panels through the energy retailer.

Which solar power system is best for Brisbane homes?

A 6.6kW solar power system is perfect for Brisbane homes. 6.6kW solar systems typically come with 20 x 330W solar panels, and a 5kW inverter - allowing you to claim 33% more solar rebate than a 5kW system, and also help you to produce more power during low light conditions.

Are solar batteries a good investment in Brisbane?

The return on investment for solar batteries in Brisbane is currently lower than the return for solar panels. This is mainly due to the fact that the cost of solar batteries is comparatively much higher and there is no rebate available for battery storage in Queensland or federally across Australia.
