

How much does solar power cost in NSW?

Instead, individual electricity retailers assign a value to exported solar power as they see fit. It is a competitive market so electricity retailers do have an incentive to offer a reasonable feed-in tariff to win customers with solar panels installed. According to Energy NSW, the benchmark rate is 4.9 to 6.3 cents per kWh for 2024/2025 in NSW.

Is solar power a good option in NSW?

NSW has the right climate for solar to produce power most of the year so solar is a good and affordable option. Choosing the right feed-in tariff reduces your reliance on the grid and lets you use clean energy. It's a small thing that can save you money and the planet. Why Is Solar Power Important?

What retailer has the best solar feed-in tariff in NSW?

At the time of writing (March 2025), ENGIE and Globird Energy currently have the highest solar feed-in tariff offer in NSW, whereby the maximum a customer can get is 12 cents per kilowatt hour (c/kWh). Energy Australia, Red Energy, Alinta Energy and AGL come in second with 10 c/kWh.

Is New South Wales a good place to buy solar?

New South Wales has a well-developed energy market, with a myriad of retailers offering a range of solar products. Feed-in tariffs in NSW can be anywhere from 1c/kWh to 12c/kWh or more, meaning it's definitely in your financial interests to shop around.

Why should you invest in solar in NSW?

Solar in NSW should be second nature - it's a win win where you save and help the environment. Here's why: With solar feed in tariffs (FiTs) you get paid for the energy you produce. Origin Energy, Energy Australia and AGL have the best feed rates in 2025.
