

What is the best portable solar charger?

Among the smaller panels, the BigBlue SolarPowa 28 is the top dog of portable solar chargers. It is impressively efficient and performed the best in all our testing. This model is the fastest portable solar charger we tested, and it delivers consistent charging even as conditions change.

Which solar charger should I choose?

To help you make an informed decision, we tested multiple solar chargers and evaluated each based on its power, versatility, durability, and portability. Our top picks include the EcoFlow Bifacial Foldable Solar Panel, Goal Zero Nomad 5 Solar Charger, and BioLite SolarPanel 10+ Solar Charger.

Which solar charger is best for your car?

For a solar charger that can both throw shade into your car and potentially jumpstart it, the Pale Blue Earth Approach Portable Solar Panel (\$80) is the one. We've been using it for the better part of a year. By comparison, the BioLite SolarPanel 100 is 30% smaller yet can generate 66% more power.

Are solar chargers suitable for small electronics?

Solar chargers are ideal for small electronics like smartphones and satellite messengers. They can directly convert sunlight into power for these devices. Unlike larger solar panels, they don't require a power station, which could potentially damage your electronics.

What is the most powerful solar charger tested?

The EcoFlow 220W Bifacial Portable Solar Panel is not only the most powerful solar charger we tested but also the most talented. If you have the cash, it's a great value for what you get.

What is the best solar charger for off-grid camping?

For off-grid camping, a 110-watt solar panel is best for charging a large power station. These high-wattage solar chargers (100 watts or more) are the largest you can still pack away to move, offering fast charging speeds for large battery banks or power stations.
