

What is a commercial EV charging station?

Commercial electric vehicle (EV) charging stations designed with reliability and performance in mind. AC level 2 and DC level 3. [Learn more](#)

Are EV charging stations a good option for your business?

If the benefits outweigh the costs, then EV charging stations are a great investment for your business! Most commercial facilities choose Level 2 or DC fast chargers, which are priced at the mid-range and high-end respectively, while Level 1 chargers are the most affordable.

What is an EV fast charging station?

Turns any three-phase outlet into a DC fast charger. True off-grid mobile EV fast charging stations with integrated batteries, ideal for charging electric vehicles anytime, anywhere. Fully customizable with various kW outputs, kWh battery capacities, and EV charging protocols. Dual level 2 EV charging stations with integrated media screens.

What are the different types of EV charging stations?

Electric vehicle (EV) charging stations come in three distinct power levels: Level 1, Level 2, and Level 3 (DC fast charging). These options offer varying charging capacities to meet the diverse needs of EV owners.

Who pays for the installation of EV charging stations?

The EV charging contractor will install your stations for you and take on the cost, then collect the revenue your stations receive from drivers charging their EVs. A variation of this option would be the EV charging installer splitting both the cost and revenue with you.
