

Are CALB batteries any good?

These CALBs are excellent batteries, at this price though you should be getting a battery at about 300ah, not 180ah. And yes I know CALB doesn't sell these in a 300ah size, I am just making the point of poor value. Shame on whomever is trying to sell these batteries at such a high price. Woot!

What is the capacity of a CALB 180Ah battery?

CALB 180Ah Battery: LiFePO4 (Lithium Iron Phosphate) batteries rated at 180 Ah or .576 kWh @ 3.2V

What is CALB?

CALB is an ISO9001 certified manufacturer of lithium-ion cells and energy storage systems. They aim to provide the best battery solutions available today and in the future to promote a low carbon economy and sustainable development globally.

How much does a CALB battery cost?

When you add in the Amazon fees, shipping, and tax...it's not much markup. Just a convenient way to get some genuine CALB batteries :) This 180 Ah battery should be selling for \$1.20 per Ah at the most that is with a .10 per Ah markup. Although these batteries are great (if this really is a China Aviation Lithium Battery) this is a complete ripoff.

How much does a 180 Ah lithium battery cost?

This 180 Ah battery should be selling for \$1.20 per Ah at the most that is with a .10 per Ah markup. Although these batteries are great (if this really is a China Aviation Lithium Battery) this is a complete ripoff. I feel the people selling these should be ashamed of themselves for trying to bamboozle the general population like this.
