

Can you leave a car in a charging station?

Charging spaces are for charging only, not for parking. You shouldn't leave your car in the charging station after it has fully charged. Make sure you move your car after it has charged fully, so other customers can have access to the charger. Consideration is key when using the charging point. Don't do what you won't like others to do to you.

Should I move my car when fully charged?

Always move your car when fully charged, unless it is directly intended for longer stays - e.g. it is a 7kW charge post at park and ride or similar. At destination chargers (not Rapids) just plug in and leave it whilst you go about your business. Don't "park" in an EV charging spot and not at least plug-in. That's even worse than ICE'ing (IMHO).

Can you leave a charging car unattended?

We will explore if you can leave your car when charging and when fully charged, whether it is okay to unplug another's car and what good charging etiquette entails. You can leave your charging car unattended at a public charging point. Unlike gas cars, you don't have to wait between 30 mins to 1 hour for your car to get full.

Can electric cars be charged at public stations?

Charging electric cars at public stations can get chaotic if car owners don't adapt to certain etiquette. While there are no legal rules guiding using these stations, some electric car owners may act in certain ways that may make the charging experience of another user horrible.

Are electric cars safe when charging?

People normally leave their cars while charging. Electric cars are safe when charging. They don't need special monitoring. Also, people don't have many hours to wait on cars while charging as they have a lot of things to get done during this period.

What should I do if I'm not charging my EV?

Circling back to the never charge past 80%, if you are not charging, get your car out of that spot. The social media clubs are packed with images of EV owners parked, but not charging in EV charger locations. The group members discuss harming the vehicle or the owner. Don't be a jerk.

ICE cars don't need and can't make use of charging locations, so when they occupy a charging bay, an electric car that might need to top up can't use it. It's frustrating for EV drivers, especially as chargepoints are usually far ...
