

# Can tesla charging stations charge all electric cars

Can electric cars use Tesla Superchargers?

Electric cars with CCS connectors can use Tesla Superchargers. Electric vehicles (EVs) with Type 2 connectors can also use Tesla's destination charger network. To access the brand's charging stations, you'll need access to the Tesla app. Can any EV use a Tesla charging station?

Does Tesla charge at a Supercharger station?

Tesla owners are billed for charging by the minute or kilowatt-hour for "supercharging" subject to local law. While Tesla drivers have the company's Level 3 and newer Supercharger stations exclusively right now, they can charge at most any EV charging station that utilizes adaptor cables.

How do I Charge my Tesla EV?

Download the Tesla app - Tesla charging stations have no display to allow users to control the charger locally. To access and manage charging, you'll have to download the Tesla app to your smartphone. Check Superchargers for compatibility \* - Not all Tesla Superchargers are available to non-Tesla EVs.

How do I Charge my Tesla If I don't have a Tesla?

If you own a Tesla, you simply reverse into a bay, plug the connector into the car and the charging session will start automatically because the charger will be able to detect and figure the car out. However, if you don't have a Tesla, things are a little more complicated. Plug the connector into the car.

How can BMW EV owners pay for charging at Tesla superchargers?

BMW says it's working on integrating a way to pay for charging with an in-car app as well as providing directions to Tesla chargers through the car's navigation. Existing EVs with the CCS-type port will also be compatible with Tesla's supercharger network through an adapter.

Can I use Tesla Chargers if my EV isn't a Tesla?

It's possible to use Tesla chargers if your EV isn't a Tesla. However, as InsideEVs points out, there are limitations. It's important to know that only Teslas can use the Tesla high-speed superchargers. No exceptions. There are currently no available adapters that can enable you to use one of these on a non-Tesla vehicle.

For an EV with a 60kWh battery, you'll pay roughly \$35 to \$42 to fully charge a Tesla car or \$47.40 for a non-Tesla car, which comes down to \$39.60 for a non-Tesla with the monthly subscription.
