

Can you use car charging station for other device

Can I use other electric cars with Tesla Chargers?

Yes, other electric cars can use Tesla chargers with the help of adapters. Tesla chargers, including the Mobile Connector, Wall Connector, and Destination Charger, can accommodate J1772 EVs with the use of Tesla to J1772 charger adapters.

Can You charge a non-Tesla car at a Supercharger station?

Now, though, that is changing! Tesla has opened up select Supercharger stations to other vehicles, and with a few easy steps, you can charge your own non-Tesla vehicle at a Supercharger station. Here's what you need to know to make the most of it.

Do you need a smartphone to charge an electric car?

You'd be forgiven for thinking you need a smartphone to use many charging points - but that's not the case. While a growing number of electric car public chargers do offer quick access to their networks via smartphone apps, you don't need to buy a smartphone or take out a costly mobile contract to use them to charge up.

Can I use a car charger as a guest?

Although you can register to use these networks, it's also possible to use them as a guest. That means all you need to do is plug your car into a charger and tap your bank card on the reader to get the charge you need.

How can I charge a non-Tesla vehicle?

To charge a non-Tesla vehicle using a Tesla charger, non-Tesla drivers must use at least version 4.18.0 of the Tesla app. Press the 'Charge Your Non-Tesla' option and a prompt will ask you to add a payment method to begin charging. Other electric cars can use CCS common connections with Tesla's Superchargers.

Can a non Tesla EV use a supercharger?

Other electric vehicles can use CCS common connections with Tesla Superchargers. Yes, non-Tesla electric cars can use Tesla chargers with Tesla-to-J1772 adapters. There isn't an official per kWh price for non-Tesla EVs using Superchargers yet, but rates will vary depending on the location.
