

Where can I get EV charging in New Zealand?

At EVSE, we provide comprehensive solutions for EV charging in New Zealand. Whether you are looking for a home charging station or need a commercial EV Charging setup, we offer a fixed-price installation service with a quality guarantee for homeowners.

Are wall-mounted EV chargers a good choice in New Zealand?

Wall-mounted home EV chargers provide faster charging with higher AC power ratings, usually giving you around 40km of range per hour. These chargers are perfect for overnight charging of long-range vehicles and are the recommended choice in the industry here in New Zealand.

Should I install an EV charging station at home?

Most carmakers recommend installing an EV charging station at home to improve recharging times indicated by kW (charging speed). EVSE delivers safe, affordable & fast charging across New Zealand. We make it easy to charge your electric vehicle with quality EV chargers & cables.

How do I find a charging station in New Zealand?

We recommend you download and use an APP called Plugshare. It displays every charging station in New Zealand and therefore provides you with an unmatched overview. If you purchase any of our commercial solutions we will help you place your system onto the national charging map.

Should you install a charging station yourself?

There's no danger for you, your vehicle, your electrical installation, or for any connected devices. Don't install your charger yourself. Have it mounted by the professionals at CSME. Use this opportunity to have your home's electrical system assessed to ensure its suitability for a charging station.

What types of EV chargers are available in New Zealand?

Tethered (with fixed 5m Lead & Plug), Type 1 or Type 2. Snow (indoors), Stone, Volcanic & Sand (indoors/outdoors). Evnex is New Zealand's only full-service EV charging company, with over 3,500+ intelligent, reliable EV charge points installed in NZ, Australia, UK & Sth Pacific.
