

Which EV charging station is best for your workplace?

Level 2 chargers are ideal for workplaces due to their faster charging times and efficiency. Remember the charging units' durability, reliability, and user-friendliness when choosing an EV charging station.

Why is a workplace EV charging station important?

Modern businesses are uniquely positioned to play a significant role in this transition. As more of your employees switch to electric cars, providing a workplace EV charging station becomes integral for easing their commute and propelling your business towards an environmentally responsible future.

Are You implementing EV charging at the workplace?

As electric vehicles become more common, workplaces are installing EV chargers for their staff and visitors. Here's our ultimate guide of everything you need to consider for successfully implementing EV charging at the workplace.

Are workplace EV chargers a good idea?

By providing workplace EV charging at your property, you actively support your employees' use of zero-emission vehicles. This move remarkably bolsters your company's sustainability goals and reduces your overall carbon footprint. For businesses aiming to achieve net-zero emissions, workplace EV chargers are a significant step toward that target.

What is a workplace charging scheme?

A workplace charging scheme is a tangible demonstration of a company's commitment to its employees' needs and preferences, especially the growing fraction of EV drivers among them. Installing EV chargers at the workplace significantly eases the commute for these employees, enhancing their workplace experience.

Should you offer free EV charging at the workplace?

If you're motivated by increasing EV uptake among your team, offering free charging at the workplace could be a great incentive. However, the cost of charging an EV is still very low compared to buying petrol or diesel, so setting a usage fee shouldn't put off your staff either.

By installing EV charging stations for the workplace, companies can support their employees' transition to electric vehicles, substantially reducing greenhouse gas ...
