

Where can I charge my electric car?

Although electric car drivers primarily charge at home, workplace and public chargers are increasingly available in communities nationwide. Use the EV Charging Station Map to find nearby charging. Level 1 is the slowest method, but sufficient for drivers who charge overnight and travel 30-40 miles per day.

How much does electric car charging cost in California?

Contact your electric utility to find out more. Find out how simple home charging is for current electric car drivers. While electricity costs vary, the average price in California is about 18 cents per kilowatt hour (kWh).

Where can I find charging stations?

ChargeFinder is available as an app for iOS and Android. Specific city pages provide a good overview of charging stations in a particular city. Download the app from Apple App Store or Google Play. ChargeFinder will eventually also be available as apps in Apple CarPlay, Android Auto, and Android Automotive.

How much does it cost to charge a car in California?

The industry is moving toward a fee structure based on kWh used, rather than by the time it takes to charge the car. Drivers in California may expect to pay 30 cents per kWh to charge on Level 2, and 40 cents per kWh for DC fast charging.

How do I find out if a charging station is nearby?

To find out if a charging station is nearby, use ChargeFinder's station page which shows relevant information like charging speed, outlet type, price, and location. Additionally, the "Food and Shopping Nearby" feature helps you find points of interest near the charging station.

Where can I find a DC fast charging station?

Stations offering DC fast charging are found in shopping centers and often along major travel corridors, allowing electric car drivers to charge up quickly and take longer trips. DC fast chargers come with a CHAdeMO, Combined Charging System (Combo or CCS) or Tesla connector system.
