

Can Delaware improve charging stations for electric vehicles?

Improving the availability of public charging stations for the growing number of electric vehicles on Delaware roads is the goal of a grant program announced this week by the Delaware Department of Natural Resources and Environmental Control (DNREC).

Where can I find charging stations?

ChargeFinder is available as an app for iOS and Android. Specific city pages provide a good overview of charging stations in a particular city. Download the app from Apple App Store or Google Play. ChargeFinder will eventually also be available as apps in Apple CarPlay, Android Auto, and Android Automotive.

How do I find out if a charging station is nearby?

To find out if a charging station is nearby, use ChargeFinder's station page which shows relevant information like charging speed, outlet type, price, and location. Additionally, the "Food and Shopping Nearby" feature helps you find points of interest near the charging station.

What power level does a destination Charger offer?

Destination chargers usually provide an output of 3 kW to 22 kW. The color shades on the map indicate the power level: light orange for 3-7 kW and darkest orange for 22 kW. The most common are fast chargers, shown in dark blue, which provide 50 kW.

What if a station is missing from the charging map?

If a charging station is missing from the map, it is easy for anyone to add it. It is also possible to edit and update information on all existing stations.

How can I check if a charger is available?

ChargeFinder provides live status for all major operators in one place. On the overview, you can see the number of chargers that are available, occupied, or out of order. With a simple click, you can view the price and availability for each charger.
