

How do you charge an electric vehicle?

When it comes to charging an electric vehicle, consumers generally have two primary options: public charging stations and home-based setups. Public charging often provides the convenience of faster charging speeds but usually comes at a higher per-kWh cost.

How much does it cost to charge an EV?

The average U.S. cost to charge an electric vehicle (EV) is about 16 cents per kilowatt-hour. One kilowatt-hour can move most EVs two to three miles. EV drivers can often benefit from reduced rates from their electric utility that encourage charging when demand is lowest, typically from 11 p.m. to 6 a.m.

How do I calculate the cost of charging an electric car?

To calculate the cost of charging an electric car, use our online calculator. You can set your own electricity price to get an accurate estimate for your area.
