

## Car phone charging station that opens and closes

How does a wireless car charger function?

A wireless car charger works by placing your phone in your car mount or on it. Once your phone is in place, it automatically starts charging. You don't need to plug in a cable every time you get in your car.

How to remove a phone from a car wireless charger?

All you have to do is place your phone on the holder and the clamp will automatically grip it and keep the phone begins charging. One-touch release that touches the back sensor area of the car wireless charger to remove the phone without unplugging the device.

Do cars come with wireless phone charging?

Wireless phone charging is an essential feature for cars, but the vast majority of newer cars don't have wireless charging capabilities. When they do, it's available only as an overpriced add-on. That means it's up to you to get wireless chargers for yourself.

Which wireless car charger should I choose?

When selecting a wireless car charger, consider one with an auto clamping feature. This feature makes it easier to use, as the arms on the mount open when you move the phone close to the mount and shut when you place the phone on the mount. The iOttie Auto Sense Wireless Car Charger is a top choice for this reason.

How to use wireless phone charger for car?

Wireless phone charger for car can power your phone through case within 6 mm. Metal, Magnet, Credit card and kickstand should be removed before charging. Support horizontal Air vent. Place the vent clip directly onto the air vent blade, and then use the bi-directional lever to clamp the mount to the air vent.
