

What is CATL Battery Company?

CATL, or Contemporary Amperex Technology Co. Limited, is a spin-off of Amperex Technology Limited (ATL), which was founded by Yuqun Zeng as a battery company for consumer electronics in 1999. In 2011, when the EV industry boomed in China, Zeng realized that vehicle batteries could present a massive, long-term opportunity.

What makes CATL a good battery company?

CATL is a good battery company because Ford can bring the efficiency and scalability of its technology and plants in China to the United States through licensing. This is overwhelmingly positive for Ford and the EV industry in the United States. Additionally, CATL has positioned itself as a global leader in battery research and innovation.

What does CATL do?

Our business includes research and development (China), manufacturing and sales of battery systems (lithium-ion batteries) for electric vehicles and stationary energy storage systems. According to SNE Research, CATL's EV battery consumption volume ranked first in the world for six consecutive years, enjoying wide recognition by global OEM partners.

When will CATL open a battery factory in Europe?

Chinese market leader CATL has already opened its first battery factory in Europe in 2023. The company is currently working on further scaling up production in Arnstadt, Germany - and is looking for more staff to do so. The ground-breaking ceremony on the former Solarworld site near Erfurt took place in October 2019.

Where are CATL batteries made?

The ground-breaking ceremony on the former Solarworld site near Erfurt took place in October 2019. Around three years later, in December 2022, CATL produced the first battery cells at the Arnstadt plant. The factory has officially been in operation since 2023, and the cells produced there are delivered to customers in Germany and Europe.
