

What happened at CATL's battery recycling plant?

According to media reports, the explosion occurred at the battery recycling plant. On January 7, an explosion occurred at CATL's Brunp Recycling Technology plant in the city of Ningxiang in Hunan province, China. According to Reuters, one person was killed and six were seriously injured.

What happened at CATL?

Later on Sunday, CATL responded that "the fire has been extinguished and there are no casualties." Fortunately, no casualties have been reported. The cause of the fire is still under investigation. The company commented that it expects the impact on production is going to be "small".

What happened at a Chinese battery factory?

Chinese battery manufacturer CATL responded to a fire incident at one of its production facilities, where a fire broke out in an independent building within the Dongqiao plant at the company's Ningde base in China's Fujian Province yesterday afternoon.

What happened at a used battery recycling factory?

(Yicai Global) Jan. 8 -- A used battery recycling factory belonging to a subsidiary of Chinese electric vehicle battery giant Contemporary Amperex Technology caught fire last night. Several people were injured but there were no fatalities, the local government said.

How will CATL impact the EV industry?

CATL's battery production capacity reached 259.7 GWh last year - more than a third of the entire world EV battery production capacity. Any disruption in their operations would have the potential to have a significant impact on the industry, especially Chinese automakers. Add Electrek to your Google News feed.

What happened at a Chinese battery factory in Ningde City?

A fire broke out at a factory of Chinese battery giant #CATL in Ningde City, Fujian Province, on Sunday afternoon. Later on Sunday, CATL responded that "the fire has been extinguished and there are no casualties." Fortunately, no casualties have been reported. The cause of the fire is still under investigation.

Original CATL 62.5Ah For Golf Carts/Electric Forklifts/EV, widely application. 1.Manufacturer Automated production, Product consistency. ... Low temperature rise. 3.Excellent rate performance. 4.Explosion-proof & No leakage. ... CATL ...

An explosion has hit a factory operated by battery recycling firm Hunan Brunp Recycling Technology, a subsidiary of major China based battery manufacturer Contemporary Amperex Technology (CATL). Yesterday's ...
