

How much money does CATL invest in a new battery plant?

Both companies will invest 4.1 billion EUR into a new plant that will produce lithium iron phosphate (LFP) batteries for vehicles from the Stellantis group. The plant's annual production is up to 50 GWh of battery capacity. CATL currently has three battery projects in the European Union (EU), including the one in Spain.

Is CATL a leader in the EV battery market?

CATL held a commanding lead in the EV battery market last year, accounting for over a third of global usage. The world's largest EV battery maker expects to announce another big partnership for a new EV plant in Europe by the end of 2025. The new facility will be separate from the one announced last month with Stellantis.

What do we know about CATL's new battery plant?

Here's what we know so far. At the World Economic Forum on Tuesday, CATL's co-chairman, Pan Jian, said the company expects to partner with another automaker in Europe to open a new joint venture battery plant. According to local media Jiemian, the new facility will be in addition to the one announced in December with Stellantis.

How many EV battery plants does CATL have in Europe?

CATL already has two EV battery plants in Europe, one in Germany and the other in Hungary. Last month, it announced its third through a new partnership with Jeep maker Stellantis. The facility will produce LFP batteries for Stellantis in Spain. Production is expected to start by the end of 2026 and have an annual capacity of up to 50 GWh.

Why is CATL advancing EV battery technology?

CATL continues advancing EV battery technology as it aims to develop longer-range, faster charging units. The company, which dominates the industry, led again in 2023 for the seventh straight year, with EV battery consumption reaching 259.7 GWh.

How many battery plants does CATL have?

The plant's annual production is up to 50 GWh of battery capacity. CATL currently has three battery projects in the European Union (EU), including the one in Spain. The other two are battery plants in Germany and another in Hungary, both already in operation, according to CATL.

The Citi analysts said that CATL expects total battery shipments to the U.S. market, including both direct and indirect sales, to cover a single-digit percentage of total battery sales, ...

CATL unveils powerful 500-mile EV batteries for heavy trucks with 15-year life. The long-life version of the Tectrans battery can last up to 1.86 million miles and 15 years, ...

Wu also said CATL aimed to produce all-solid-state EV batteries in small volumes in 2027, the first time the news was made public. CATL launches Shenxing Plus EV battery (Source: CATL) Top comment ...

Contemporary Amperex Technology Co., Ltd. (CATL) successfully held its first online launch event "Tech Zone" on July 29. Dr. Robin Zeng, chairman of CATL, unveiled the company's first-generation sodium-ion ...

XIAMEN, China (AP) -- The world's largest maker of batteries for electric vehicles said Wednesday it will get into battery swapping in China in a big way starting next year.. The idea behind battery swapping is to refuel quickly, ...
