

On April 4, Contemporary Amperex Technology Thuringia GmbH (CATT), CATL's first plant outside of China, received the 2nd partial approval for the commissioning of a new plant for battery cell production from the state of ...

Eventually, the Chinese battery giant plants to achieve a production capacity of 14 GWh and create 2,000 jobs in Germany after a total investment of EUR1.8 billion (\$2 billion).

In Thuringen beginnt nun die Serienproduktion des chinesischen branchenriesen CATL. Kunde ist unter anderem BMW. ... Mega-Werk in Thuringen Batterie-Riese CATL beginnt Produktion in Deutschland ...

A battery pack cross-section on display at the Contemporary Amperex Technology Co. Ltd. (CATL) booth at the IAA Transportation fair in Hannover, Germany, on Monday, Sept. ...

CATL kicked off production at its plant in the central German state of Thuringia in December 2022 and is building Europe's largest battery plant in Debrecen, Hungary, with the aim of starting ...

BERLIN - Chinese battery giant CATL is set to install six battery cell production lines by the end of 2023 and hopes to secure approval for 24 gigawatt-hours (GWh of capacity) by June, Matthias ...

Located in Thuringia, the facility owned by the Contemporary Amperex Technology Thuringia GmbH (CATT) is the first battery production plant outside China. The plant, which began production of battery modules in 2021, ...

Chinese battery giant CATL is putting down roots near the small central German town of Arnstadt, ploughing ahead with the ramp-up of battery cell production despite uncertainty over Germany's ...

CATL to begin battery cell production in Hungary's Debrecen- ... The new plant, located in Debrecen's Southern Industrial Park, will be CATL's second battery manufacturing ...

Photo taken on Sept. 11, 2019 shows staff are working at the CATL. (Xinhua/Lin Shanchuan) Chinese battery manufacturer Contemporary Amperex Technology Co. Limited ...

August 12, 2022 - Mercedes-Benz is taking another step to scale up development and production of next-generation high-performance battery cells and modules on its path to an all-electric future. The new CATL plant in ...

CATL's first battery cell production facility outside of China will have an initial capacity of 8 GWh per year, with plans to increase it to 14 GWh over time. The Chinese battery maker...

CATT received the permit for battery cell production from the state of Thuringia this April, which allows an initial capacity of 8 GWh per year. The plant has already started ...

CATL's plant in Thuringia, Germany, achieved mass production of lithium-ion battery cells on schedule, with the first cells coming off the first production line in the G2 facility, the company announced today. Installation ...

CATL's German plant starts battery cell production. By AMS 2023-01-04T11:04:00+00:00. No comments. ...  
CATT received the permit for battery cell production from the state of Thuringia in April 2022, which allows an initial ...

CATL began production of lithium-ion battery cells in Thuringia, a largely rural eastern German state, in late 2022, and operates a logistics center there as well. The plant ...

In December 2022, Chinese battery manufacturer CATL kicked off the production of lithium-ion battery cells at its new plant in Germany. And according to CATL, the battery plant will have an annual production capacity ...

Contemporary Amperex Technology Co. Limited (CATL), the world's largest electric vehicle battery manufacturer, announced that its new lithium-ion battery cell plant in Germany started...

The plant's annual production is up to 50 GWh of battery capacity. CATL currently has three battery projects in the European Union (EU), including the one in Spain. The other two are battery plants in Germany and another in ...

Production is expected to start by the end of 2026 and have an annual capacity of up to 50 GWh. Stellantis and CATL will invest up to EUR4.1 billion, or around \$4.25 billion, to build the large ...
