

What makes CATL a great battery company?

CATL's founder was a scientist before being a businessman. The culture of the company he founded reflects that. From the beginning, CATL's strategy has been to produce the best possible batteries, not necessarily the cheapest or the easiest to manufacture. To achieve this, the company is spending as much as it can on R&D.

Is CATL on the way to grow its market share?

Overall, it seems CATL is on the way to keep growing its market share among battery volume, from the current 35% to potentially 40-60%. All this while the market itself grows quickly, driven by the costs saving CATL technology creates. Currently, there are no serious competitors for the million-mile battery technology.

What does CATL stand for?

Goldman analysts Trina Chen and Joy Zhang explained in a client note Thursday that reports of Chinese battery giant Contemporary Amperex Technology (CATL) cutting lithium production at a major mine in...

Why did CATL stock drop 2% on Wednesday?

Despite the confidence and higher net profits, CATL's stock slipped around 2% on Wednesday following the lower revenue expectations. CATL shares are still up nearly 70% over the past 12 months, as the EV battery leader launched new products and expanded its global market lead. Add Electrek to your Google News feed.

Is CATL a new company?

CATL is a rather new company by today's tech industry standards. Compared to Google or Amazon, founded in the 1990s, or even Tesla in 2003, the CATL foundation in 2011 is downright recent. The company is a spin-off of Amperex Technology Limited (ATL), which produced batteries for small consumer electronics and was founded in 1999.
