The market capitalization, commonly called market cap, is the total market value of a publicly traded company's outstanding shares and is commonly used to measure how much a company is worth.

Is CATL on the way to grow its market share?

Overall, it seems CATL is on the way to keep growing its market share among battery volume, from the current 35% to potentially 40-60%. All this while the market itself grows quickly, driven by the costs saving CATL technology creates. Currently, there are no serious competitors for the million-mile battery technology.

What makes CATL a great battery company?

CATL's founder was a scientist before being a businessman. The culture of the company he founded reflects that. From the beginning, CATL's strategy has been to produce the best possible batteries, not necessarily the cheapest or the easiest to manufacture. To achieve this, the company is spending as much as it can on R&D.

Is CATL a new company?

CATL is a rather new company by today's tech industry standards. Compared to Google or Amazon, founded in the 1990s, or even Tesla in 2003, the CATL foundation in 2011 is downright recent. The company is a spin-off of Amperex Technology Limited (ATL), which produced batteries for small consumer electronics and was founded in 1999.
