

Catl chairman doubts the success of tesla s 4680 battery cells

Will Tesla's 4680 battery cell be successful?

A chairman from China-based battery giant Contemporary Amperex Technology Co. Limited (CATL) recently cast doubt on Tesla's 4680 battery cell, saying that he didn't think it would be successful in the long run.

Is Tesla's 4680 battery project going to fail?

I definitely asked him why. He told me he wanted to push people." Robin Zeng, the founder and chairman of CATL (Contemporary Amperex Technology Co.), the world's largest EV battery company based in Ningde, China, has made a blunt assessment of Tesla's ambitious 4680 battery project, declaring it "is going to fail and never be successful."

Does Tesla have a 4680 battery?

While Tesla continues to heavily invest in its proprietary 4680 cells, CATL and other manufacturers are exploring alternative approaches, such as advancements in LFP batteries and the development of solid-state batteries. Zeng also touched on Musk's leadership style in the Reuters interview, particularly his tendency to set ambitious timelines.

Will Tesla's 4680 battery cell revolutionize the automotive industry?

At its Battery Day in 2020, Tesla unveiled its 4680 battery cell and made a big deal about how the new battery cell format could potentially revolutionize the industry by cutting costs by almost 50%. At the time, the automaker was already operating a pilot production line in Fremont, California.

Are Tesla's 4680 battery cells a game-changer in EV technology?

Tesla's 4680 battery cells, named for their dimensions (46mm diameter and 80mm length), are a significant technological bet for the company. Introduced in 2020, these cells were touted as a game-changer in EV battery technology.

Why did Tesla sign a long-term battery cell agreement with CATL?

Tesla has signed a new long-term battery cell agreement with CATL, China's biggest battery manufacturer, amid the race to secure a large battery supply in the auto industry. The electric vehicle revolution is in need of an insane amount of batteries in order to keep growing at a high pace.

A chairman from China-based battery giant Contemporary Amperex Technology Co. Limited (CATL) recently cast doubt on Tesla's 4680 battery cell, saying that he didn't think it would be ...

Tesla has released an encouraging update on the development of its 4680 battery cells, which it was reportedly close to giving up on. According to a recent report, Elon Musk reportedly gave an end ...

Catl chairman doubts the success of tesla s 4680 battery cells

Robin Zeng, the chairman of Contemporary Amperex Technology (CATL), the world's largest electric vehicle battery maker, has expressed his skepticism about Tesla's 4680 cylindrical cell ...

CATL is the world's largest battery maker. Its founder and chief, Robin Zeng, blasted Tesla CEO Elon Musk for his bet on the 4680-type cylindrical cell.

In a recent development within the electric vehicle industry, Robin Zeng, chairman of Contemporary Amperex Technology Co. Limited (CATL), expressed skepticism about the ...

The Laboratory for Energy Storage and Conversion carried out the testing and data analysis of the two 4680 cells reported in this article. The goal of the Laboratory for Energy Storage and Conversion (LESC), at the University ...

CATL's chairman questions Tesla's 4680 battery success. Tesla advances 4680 production despite criticisms. Partnership and competition shape EV battery landscape.

Robin Zeng, founder and chairman of Contemporary Amperex Technology Co., Limited (CATL), the world's leading EV battery manufacturer, has expressed skepticism about ...

The 4680 battery cell, named for its dimensions (46mm by 80mm), promises significant improvements in energy capacity and cost reduction for Tesla's EVs. Despite its ...

A chairman from China-based battery giant Contemporary Amperex Technology Co. Limited (CATL) recently cast doubt on Tesla's 4680 battery cell, saying that he didn't think ...

Tesla now says that it expects its own 4680 battery cells to become cheaper than those coming from suppliers by the end of the year. 4680 is a new cell format enabled by new technologies, like ...

The Tesla 4680 Cell Generation 2 is interesting as this has been in the battery and electric vehicle news so much. We originally looked at the Tesla 4680 cell back in November ...

Robin Zeng, the founder of the world's largest EV battery company, says Tesla CEO Elon Musk's big bet on 4680 cylindrical cell technology "is going to fail and never be successful." Zeng, the...

Tesla's touted 4680 battery faces a formidable competitor as CATL's superior cell nears release 05/05/2022 Unlike Elon Musk, CATL says "long range still a trend," teases a 600-mile battery and a ...

In a striking challenge to Tesla's direction, CATL founder and chairman Robin Zeng has publicly criticized Tesla's commitment to 4680 cylindrical cells, ...

Catl chairman doubts the success of tesla s 4680 battery cells

The 4680 battery, introduced in 2020, promises higher energy density, lower manufacturing costs, and streamlined assembly compared to its predecessors, the 2170 and 1865 cells, used across Tesla's Model 3, Model ...

Robin Zeng, the founder and chairman of CATL (Contemporary Amperex Technology Co.), the world's largest EV battery company based in Ningde, China, has made a blunt assessment of Tesla's ambitious...

According to the world's largest battery maker, Elon Musk is overpromising on the 4680 battery cells that Tesla intends to place in everything, from the Robotaxi to the Model Y Juniper.

By Zachary Visconti Posted on November 16, 2024 A chairman from China-based battery giant Contemporary Amperex Technology Co. Limited (CATL) recently cast doubt on ...

""The 4680 is going to fail and never be successful."" - Robin Zeng, CATL Founder and Chairman. You've likely heard all the hype surrounding Tesla's 4680 battery cells. ...
