

Where are CATL batteries made?

In 2019, the battery giant broke ground in central Germany to build a \$2 billion CATL battery gigafactory for BMW and Volkswagen. The factory covers 57 acres and has the capacity to build batteries for hundreds of thousands of cars annually. CATL began building this assembly facility when it was still a young, 8-year-old company.

Does CATL manufacture lithium ion batteries?

CATL has more than half of the metal-refining capacity needed for battery manufacturing, including 93% of the manganese and 100% of graphite needed for lithium-ion batteries. CATL has invested in maintaining its position as a global leader in battery manufacturing.

Does CATL own a battery factory?

CNN has reached out to CATL for further comment. As of last year, CATL operates 13 battery factories around the world, including in China and Germany, according to the filing. The firm has previously announced it was working on a joint venture in Spain with Stellantis, the owner of Fiat and Chrysler, to build a battery plant.

Is China's 'CATL' a good stock to buy in Hong Kong?

China's Contemporary Amperex Technology (CATL), the world's largest producer of batteries for electric vehicles and a supplier for Tesla, has applied for a listing in Hong Kong, setting sights on one of the city's largest stock offerings in years. The battery giant expects to raise at least \$5 billion, according to Reuters.

What kind of batteries does CATL offer?

CATL specializes in lithium-ion battery technology, with a strong emphasis on lithium iron phosphate (LFP) batteries, which are known for their safety, longevity, and cost-effectiveness.

Does CATL make EV batteries?

CATL doesn't just make batteries, but it also recycles 90% of lithium and nearly 100% of other raw materials like cobalt and manganese. The battery company has a gigafactory in Germany to help BMW and VW build new EVs and meet the European Union's carbon emissions goals.
