

Will CATL list on the Hong Kong stock exchange?

On Thursday, CATL announced plans to list on the Hong Kong Stock Exchange to drive the company's "global strategic layout" and improve its competitiveness. In a filing with the Shenzhen Stock Exchange, CATL said it intends to issue overseas listed H shares and apply for listing on the Hong Kong Stock Exchange.

What is CATL's new EV chassis?

CATL launched its new Bedrock Chassis last month, which it calls "the world's first ultra-safe" EV skateboard chassis. It's also aggressively expanding its EV battery swap plans with a new line of Choco-SEB batteries, which make swapping even quicker than filling a gas tank (within 100 seconds).

Will CATL's new EV chassis unlock a trillion yuan market?

Earlier this week, CATL launched its new Bedrock Chassis for EVs. The company claims it's "the world's first ultra-safe skateboard chassis" and could unlock "a trillion yuan market." The global EV battery leader is also rapidly expanding its EV battery swap network as it looks to phase out gas stations over the next few years.

What does CATL's new funds mean for China's battery industry?

With the new funds, CATL plans to strengthen its international operations, including battery production facilities in Hungary, Spain, and Indonesia. The move reflects a broader push by Chinese companies to secure overseas growth while reducing dependence on Western markets.

Why did CATL stock drop 2% on Wednesday?

Despite the confidence and higher net profits, CATL's stock slipped around 2% on Wednesday following the lower revenue expectations. CATL shares are still up nearly 70% over the past 12 months, as the EV battery leader launched new products and expanded its global market lead. Add Electrek to your Google News feed.
