

Where is CATL lithium battery made?

CATL is the Number One lithium battery manufacturer in China. Its first production factory is located in Ningde,Fujian province,China. with a production capacity of 1.4GWH. It's one of the biggest high-quality LiFePO4 Battery production factories in China before 2017. CATL has very high qualaity factory with latest automatic technology.

What is CATL battery technology?

CATL,or Contemporary Amperex Technology Co. Limited,is a Chinese battery manufacturer and technology company that specializes in the production of lithium-ion batteries for electric vehicles and energy storage systems1 CATL is the world's largest provider of EV batteries,with a market share of 37% in 2022.

What makes CATL a good battery company?

CATL has very high qualaity factory with latest automatic technology. The R&D department has over 900 engineers and expeter in lithium battery technology,5% of revenue would be invested in R&D which make sure CATL is always as pioneers of latest lithium technology. The energy density of CATL Battery is as much as 190Wh/kg.

What is CATL battery & BMW johnt?

CATL Battery cells are in quality and they provide battery cells to BMW. they are the only lithium battery partner of BMW in China. CATL and BMW is building a new john venture to produce lithium battery in Beijing,China. CATL &BMW Johnt venture,producing high quality lithium battery in North of China.

What is the energy density of CATL battery?

The energy density of CATL Battery is as much as 190Wh/kg. CATL Battery cells are in quality and they provide battery cells to BMW. they are the only lithium battery partner of BMW in China.

What technology does CATL use?

CATL has developed several innovative technologies to improve the performance,safety, and cost-effectiveness of its batteries. Some of these technologies are: CTP Technology: This stands for cell to pack,which means that the battery cells are directly integrated into the battery pack without using modules or other intermediate components.
