

The new CATL battery is designed for longer life and stability, rather than performance, hence it comes with a comparatively low 175 Wh/kg energy density that is still the highest in the electric ...

Contemporary Amperex Technology Co., Limited (CATL) is a global leader in new energy innovative technologies, committed to providing premier solutions and services for new energy applications worldwide. ...

Stellantis and CATL will invest up to EUR4.1 billion, or around \$4.25 billion, to build the large-scale European LFP battery plant. CATL and Stellantis announce new joint venture EV battery plant ...

Currently, there is no word on when we will be seeing the new battery tech make it into a production vehicle, but according to Electrek CATL's share of the market reached as high as 36.8% in ...

CATL Debuts LFP Batteries With a Lifespan of up to 15 Years / 1.7 Million Miles BYD and CATL To Produce EV Batteries That Fully Charge in 10 Min by the End of 2024 CATL Unveils Shenxing Plus: The ...

On June 23, CATL launched Qilin, the third generation of its CTP (cell-to-pack) technology. With a record-breaking volume utilization efficiency of 72% and an energy density of up to 255 Wh/kg, it achieves the highest integration level ...

With a 40% increase in SOC control accuracy, CATL's Freevoy enables pure electric range of over 400 km (250 mi). CATL claims the new battery improves hybrid power performance by 20%.

CATL unveils powerful 500-mile EV batteries for heavy trucks with 15-year life. The long-life version of the Tectrans battery can last up to 1.86 million miles and 15 years, ...

In what it's calling the world's first, battery giant CATL (and major Tesla supplier) revealed its new "Shenxing Superfast Charging Battery" at a product launch event Wednesday. CATL says ...

The world's largest electric vehicle (EV) battery producer, CATL, has unveiled two standardized battery models in a bid to streamline electric vehicle battery swapping. The ...

As for the new sodium-ion battery, CATL was one of the first manufacturers to present its own SIB in mid-2021. The first generation had an energy density of 160 Wh/kg, but CATL was already aiming for 200 Wh/kg at ...

Speech by Robin Zeng, founder and chairman of CATL, at the 2022 World New Energy Vehicle

ConferenceFor more than ten years, ... One out of every three electric vehicles in the world is equipped with CATL's batteries. ...

CATL; CATL battery successfully powers electric plane with 1,800-mile civil aircraft expected. ... According to Zeng, on CATL's 1 to 10 scoring system, the new batteries are already at a 7.

CATL [SHE: 300750] closed up 5.2 percent at CNY258.88 (USD36.34) a share in Shenzhen today, after earlier surging by as much as 7.8 percent, bringing the stock's gain so far this year to almost 60 percent. A 10 ...

Chinese battery giant CATL on Wednesday unveiled a new ultra-high energy battery technology initially slated for aviation, and with an automotive cell under development.. The so-called ...

CATL's new condensed battery will have almost double the energy intensity of Tesla's 4680 cells, whose rating of 272-296 Wh/kg are considered very high by current standards. CATL chief scientist Wu Kai says the ...

CATL launches new Freevoy Super Hybrid Battery (Source: CATL) According to data from CnEVPost, CATL is dominating the global EV battery market with a 36.7% share through September 2024.

The Shenxing PLUS battery provides users with a super-long range driving experience, exceeding 1,000 kilometers, which means a trip from Beijing to Nanjing without recharging on the road. This allows new energy ...

CATL goes all in for 500 Wh/kg solid-state EV battery mass production. CATL's prototype solid-state batteries have an impressive energy density of 500 Wh/kg, a 40 percent ...

Sodium batteries have a lower incidence of battery fires than conventional lithium batteries. The official energy density of the new sodium-ion battery has not been reported -- ...
