Catl s founder criticizes tesla s battery strategy

Does Tesla use CATL technology?

Tesla has also licensed CATL technologyfor its upcoming battery manufacturing facility in Nevada, which is expected to become operational next year. Tesla's 4680 cylindrical cell uses a lithium-ion chemistry with a nickel-cobalt-manganese (NCM) cathode.

Who is CATL & why is it a big bet?

CATL is the world's largest battery maker. Its founder and chief,Robin Zang,blasted Tesla CEO Elon Musk for his bet on the 4680-type cylindrical cell. CATL supplies cells to Tesla's Shanghai Gigafactory and specializes in LFP batteries. Tesla placed a big bet back in 2020 when it announced that it was developing a new battery cell format.

What is the relationship between Tesla and CATL?

Tesla and CATL maintain a complex and interdependent relationship. CATL supplies batteries for Tesla's vehicles produced in China, including models sold in North America.

Does Tesla produce battery cells?

It even supplies Tesla with many battery cells for its EV production at Gigafactory Shanghai. CATL's success has made Robin Zeng,its founder and chairman,one of the foremost authorities on battery cell production, which makes his new comments on Tesla's battery cell production effort interesting.

Is Tesla's 4680 battery project going to fail?

I definitely asked him why. He told me he wanted to push people." Robin Zeng,the founder and chairman of CATL (Contemporary Amperex Technology Co.),the world's largest EV battery company based in Ningde,China,has made a blunt assessment of Tesla's ambitious 4680 battery project,declaring it "is going to failand never be successful."

Are Tesla EV batteries a game-changer?

Introduced in 2020, these cells were touted as a game-changer in EV battery technology. Tesla claimed the new design would offer five times more energy capacity and significant cost reductions compared to their previous battery designs.

In an interview, CATL founder Robin Zeng commented that zero-carbon electric grids might be ten times larger than supply EV batteries. As of this writing, CATL holds 37% of the global market share ...
