

Where can EV charging stations be installed in Illinois?

According to Illinois laws, the Illinois Department of Transportation (IDOT) may install EV charging stations at each interstate highway rest area where electrical service will reasonably permit.

Why should electricians become certified EV charger installers?

By obtaining certification, electricians can improve their income potential and secure more work in the rapidly growing EV market. Therefore, it is highly recommended that electricians interested in this field pursue available training programs to become certified EV charger installers.

Do electricians need to be certified to install electric vehicle supply equipment?

In general, qualified electricians who want to install electric vehicle supply equipment (EVSE) do not need to be especially certified. They do need training in the various types of installation such as CCS fast chargers, Smart Chargers etc, and they have the opportunity to become certified through various institutions.

Do you need a certified electrical engineer to install a charging unit?

With the increasing sales of electric vehicles and the growing demand for both personal and public charging, there is a need for qualified electrical engineers to install charging units not only in homes but also in businesses and charging stations. The shortage of certified electricians has created new employment opportunities in this field.

Which EV charging companies require electricians to be certified?

EvoCharge is another company that requires all its installers to be certified through its own in-house program. The training takes qualified electricians through the EV charging market, their portfolio of products, and how to install them.

Why do electricians need EV charger installation services?

The surge in electric vehicle sales has increased the demand for professionals to install chargers in homes, businesses, and public charging stations. This provides electricians with an opportunity to increase their income by offering EV charger installation services.
