

Where should a robotic mower charging station be located?

The flat surface should ideally be within the lawn area so that the robotic mower is not damaged by running on gravel or other unsuitable surfaces. Avoid locating the charging station near ponds, sprinklers or other areas where it could be exposed to water. Penetrating water can damage the inner electronics and charging plates.

Do robotic mowers need a charging station?

The perimeter wire that forms a boundary for the mower is connected to the charging station too. Without a charging station, your robotic mower is going nowhere, so correct installation in a safe and accessible position is essential.

Where should a charging station be located?

The location for your charging station is important so that the robot can approach it smoothly. A central location that offers about 3 meters of space in front of the station is suitable. This distance allows access from all sides without any problems.

How to choose a charging station?

A nearby power outlet is also important so that the charging station can be operated with a low-voltage cable. It is recommended that the cable be not too long or extended. An outdoor socket should of course be suitable and weather proof for optimal operation. In addition to full sunlight, it should also be protected against splashing water.

Will the OptimusMC mobile power station help a lawn care pro?

One of the biggest challenges facing lawn care Pros who want to go electric is finding the all-day power to service all of your clients. Greenworks Commercial hopes to come to the rescue with the OptimusMC mobile power station. We wanted to know how this mobile power station would help crews make the transition to battery power.

How to waterproof a docking & charging station?

Waterproofing your docking and charging station will offer some protection in harsh weathers. You can then connect the transformer to the mains outlet. Once the perimeter wire is in place, you can attach the plate of the charging station with any final adjustment to the cables.
