

How do I find electric vehicle charging stations?

Google Maps also has an Electric Vehicle Charging category you can select. Each app shows the number, type, speed, and sometimes photos of each charging station location. Some apps have live data about which stations are available at that moment. Have a backup plan.

How many electric vehicle charging stations are in Guangdong?

As of this September, Guangdong had built China's largest electric vehicle charging network, including 345,126 public charging piles and 19,116 charging stations, according to the China Electric Vehicle Charging Infrastructure Promotion Alliance (EVCIPA).

Can You Park an EV at a charging station?

Don't overstay your welcome. Charging stations are meant for charging, not for parking. In some states, you can be fined or towed for parking an EV at a charging station without actually charging. Make sure you charge efficiently and move to a normal parking space when you're finished charging. Keep your charging apps updated.

How do EV charging stations work?

In most states, charging stations are only allowed to charge by the minute, not by the amount of electricity used. Each network will send you an RFID card to use for billing. Networks also have mobile apps that allow you to activate and pay for EV charging from your phone. Charging speeds slow down dramatically when the battery reaches 80%.

What is the best way to charge an electric vehicle?
