What are electric vehicle charging stations?

Electric vehicle charging stations are flexible devices that can be installed outdoors (on an exterior wall) or indoors (in your garage), inside your property. They are needed for charging electric vehicles inside your property.

How much do ChargePoint charging stations cost?

The cost of using a ChargePoint electric vehicle charging station varies between \$4 and \$5 per hour. ChargePoint does not determine the pricing, it is set by the station owners.

Who installs the charging station?

An electrician, typically recommended by your service provider, can complete the installation of the electric vehicle charging station. This process may involve electrical panel upgrades or installations, installing the charging station(s), and connecting the charging station(s) to the electrical panel(s). In some instances, your electric utility provider may need to get involved.
