

# Charging cars at home vs charging station

Are EV charging stations worth it?

Many public stations charge more for their electricity, meaning at-home charging can help you save money. These savings can even make it so a residential EV charging station pays for itself over time. Greater home value: Besides offering savings and convenience, EV charging stations can increase your home's value.

Is a residential EV charging station right for You?

Usually, you'll have to pay to use it. In contrast, an at-home EV charging station is one that's installed at your home, and you'll only have to pay the electricity bills associated with it. Before deciding if residential EV charging is for you, learn more about the pros and cons of public and at-home EV chargers.

How much does it cost to charge an EV at home?

Charging at a public station: \$12.00 As you can see, charging your EV at home is significantly cheaper than using a public charging station for the same amount of energy. This calculation doesn't include any membership or subscription fees that some public charging networks might require.

How much does a public charging station cost?

Charging Rate: Public charging stations may have different rates. Let's assume you use a Level 2 charging station that costs \$0.25 per kWh. Charging Time: Similar to the home charging scenario, you're charging from 20% to 80%, which is 48 kWh. Calculations: Comparison: Charging at home: \$5.76 Charging at a public station: \$12.00

Are at-home EV charging stations worth it?

While there are several benefits to at-home EV charging stations, they can have some drawbacks. For example, many homeowners stick to the Level 1 EVSE charger that they received from the dealership when buying their EV. These chargers often have significantly longer charging times than chargers at many public charging stations.

Should you charge EVs at home?

In general, charging EVs at home is cheaper due to lower electricity rates and the absence of potential fees associated with public charging stations. However, public charging can be useful during travel or when you don't have access to home charging.
