

What does the charging dock do?

The charging dock holds the device in optimal viewing position and keeps all your devices charged and organized in one place. It also features a non-slip rubberized surface, which is perfect for keeping an eye on your phone while it's charging; it's also a great way to minimize clutter.

How many watts can the Dock5 charge wirelessly?

The wireless charging pad on the Dock5 can put out up to 10W, depending on the device's capabilities. The four wired ports on the Dock5 also have significant charging capabilities, with the SIIG 90W 10-Port USB Station following suit and being capable of outputting up to 2.4 amps per port.

Does the SIIG charging station have a dock?

The SIIG charging station has a charging deck for an additional phone or smaller device. It also has dedicated spots for eight tablets or phones, keeping all your electronics charged while using minimal space. However, it would have been better if it came with short USB cables instead of requiring users to use their own.

What is the best multi-device charging station?

For a more streamlined desktop setup, our top pick for a budget multi-device charging station is the SooPii, which can handle up to six devices simultaneously with five USB-A ports and one 20-watt power delivery port. Another great option is the Anker PowerPort, which can also charge six devices at once.

How many amps can a Satechi Dock5 charge?

The Satechi Dock5 has a pair of USB-A ports that can output up to 2.4 amps each. It also features USB-C Power Delivery ports and a wireless charging pad with up to 10W output, depending on the device's capabilities. The Dock5 excels in charging performance.

Which chargers allow device use while charging?

The BoostCharge Pro and ZUBARR hold the devices in an orientation that promotes their use while charging. Few other chargers can make such claims. Of the more traditional plug-in devices, the Soopii Quick Charge 3.0, Poweroni 6-Port, Satechi Dock5, and Hercules Tuff lead the pack.
