Are EV charging stations more dense than gas stations?

NEW YORK, Aug. 7, 2023 /PRNewswire/ -- A new study by Coast is uncovering EV charging station density to traditional gas stations in the U.S.

How many EV charging stations are there?

Today, there are more than 64,000 public EV charging stations in the U.S., according to the U.S. Department of Energy's Alternative Fuels Data Center. Experts say that the nation needs many times more to make a smooth, sustainable, and equitable transition away from gas-powered vehicles -- and to minimize the anxiety surrounding EVs.

Which states have more EV charging opportunities than gas stations?

Nevada: 2% more gas vehicles per vehicle registration than the national average but has 37% fewer gas pumps per road mile. Louisiana: 2% fewer gas vehicles per vehicle registration than the national average and 43% more gas pumps per road mile. U.S. States with More EV Charging Opportunities Than Gas Stations

How many EV charging ports are there in the US?

The U.S. averages about 104 gas pumps per 1,000 road miles, compared to just 22 EV charging ports as the popularity of electric vehicles rises. **Methodology** The study used data from the U.S. Department of Energy and the U.S. Census Bureau to compare EV charging port density to gas station pump density in U.S. states.

How does electric vehicle charging access vary across the country?

Electric vehicle charging access varies across the country. One of the most straightforward ways to understand that variability is by comparing EV adoption to available charging ports. States with more EVs on the road will need greater access to charging ports.

How do EV charging ports compare to gas station pump density?

**Methodology** The study used data from the U.S. Department of Energy and the U.S. Census Bureau to compare EV charging port density to gas station pump density in U.S. states. State-by-state comparisons were found by positioning the number of EV charging opportunities and gas stations against roadway miles, vehicle registrations, and square miles.

Find electric car charge points in Chicago or nearby. Navigate the map to find a charger near your destination and filter the list to your preferred speed. EV charging stations in Chicago. Target ...

We empower your transition to electric mobility with our complete electric vehicle charging solutions. Fast chargers Legacy AC chargers. ... Celebrate this milestone with us. Fit for every location. DC charging: 90 kW to 400 kW. ...
