

How do I contact Clark County solar energy resources?

Contact our Energy Resources team and we can help. 360-992-3244 or Contact Us. Harnessing the power of the sun continues to gain interest in Clark County. For customers planning to install a solar energy system, we can help with connection to our system and answer your questions along the way.

Should Clark County implement a solar ordinance?

Clark County currently does not have a solar ordinance in place. Recent interest has been shown in solar farms, and at least two wind energy companies have explored options in the county in the past few years. The ordinance will be drafted and brought back to the full board for future consideration.

How much electricity does Clark County consume?

Clark County consumes over 5,900,000 megawatt hours of electricity, making it the 5th highest out of 39 counties in the state for total electricity consumption. There has been a 3.45% increase in the use of renewable fuel sources for electricity generation in Clark County during the past 12 months.

Does NV Energy have a bifacial solar project?

NV Energy signed a 25-year power purchase agreement for the energy produced by the plant. The enormous 690-megawatt (MW) project, which Primergy Solar and Quinbrook Infrastructure Partners developed, features 1.8 million bifacial solar panels.

How do I find a reliable solar installer near me?

To make sure you find a trusted, reliable solar installer near you that offers competitive pricing, check out EnergySage, a free service that makes it easy for you to go solar. They have hundreds of pre-vetted solar installers competing for your business, ensuring you get high quality solutions and save 20-30% compared to going it alone.

Hoosier Energy's solar program consists of 10 1-megawatt solar arrays placed along highly visible roadways across member service territories. Collectively, the solar sites will ...
