

What is the Illinois coal to solar and energy storage Act?

The Illinois Coal to Solar and Energy Storage Act is a proposal to expand and deploy renewable energy technologies at existing power plant sites across central and southern Illinois.

What does Illinois' new solar law mean for the coal industry?

As enacted, the legislation supports the company's future build and operation of up to 300 MW of utility-scale solar and 150 MW of battery energy storage facilities at nine retired or to-be-retired coal plant sites across central and southern Illinois.

Is coal to solar good for the environment?

Coal to Solar is good for the environment, plant communities, consumers, and Illinois' economy," said Curt Morgan, chief executive officer of Vistra.

.10 Purpose . The purpose of the Coal to Solar and Energy Storage Initiative Fund Grant Program is to support installation of energy storage facilities at the sites of up to 3 qualifying electric generating facilities located in the Midcontinent Independent System Operator, Inc., region in Illinois and the sites of up to 2 qualifying electric generating facilities located in the PJM ...

The Coal to Solar & Energy Storage Act was sponsored by Sens. Hastings, Koehler, Rezin, Tracy, and Reps. Evans, Hoffman, and Welter prior to incorporation into SB 2408. "This innovative proposal could not have become part of SB 2408 and passed without the extraordinary leadership, diligence, and dedication of our sponsors, and Senate ...
