

How much energy will commercial solar panels produce in Perth?

How much energy will Commercial Solar Panels in Perth produce? As a rule of thumb, a solar PV system in Perth will generate roughly 5.3 kilowatt-hours(kWh) of energy per kilowatt of capacity per day on average throughout the year based on 30 years of historical sunlight irradiance data from the Bureau of Meteorology.

Why should you use commercial solar energy in Perth?

Commercial solar energy accounts for around 25% of total average electricity for businesses in Perth, boasting important environmental benefits. Solar solutions offered by Amanda are backed up by a comprehensive analysis of your historical power use, providing a custom solution to help you achieve real financial benefits and rewards.

Who is the best solar panel installation in Perth?

Considering solar for your business, it's crucial to find a company that knows what they're doing. That company is Solar Galaxy! We remain the best solar panel installation in Perth because of our years of combined experience in the commercial and residential solar industry, our fair pricing, and our top-quality products.

Do you need commercial solar panels in Perth?

Perth is one of the world's sunniest cities, so your business needs quality solar panels that can withstand conditions in WA. Choose a reputable supplier and learn more about which solar panels they use before you sign a commercial solar contract. Learn more about commercial solar panels

Why are commercial solar prices so low in Australia?

Commercial solar prices are at all-time lows in Australia, partially due to the federal government solar subsidies available through Australia's Renewable Energy Target (RET). For solar systems up to 100kW of Solar PV, the RET provides an up-front incentive in the form of Small-scale Technology Certificates (STCs).

Why should you switch to commercial solar electricity in WA?

The increasing population of WA has led to great demands for the energy industry, with many large energy consumers choosing to switch to commercial solar, not only for its financial benefits but also for its reduced environmental impact. Switching to solar electricity is just one of the ways you can reduce the carbon footprint of your business.
