

What is a solar power purchase agreement (solar PPA)?

A solar power purchase agreement (solar PPA) is an arrangement where you contract with a solar developer who pays for, installs, and maintains a solar system on your property. The system could include ground-mounted, rooftop, or carport solar panels, and it could include an energy storage system.

Is a solar power purchase agreement right for your business?

If you're looking for a cost-effective way to lock in energy costs at a fixed rate, avoid the ongoing risk of owning and operating an energy asset, and do your part for the environment, a solar Power Purchase Agreement could be a great solution for your business.

Can a business purchase a commercial solar system?

Businesses can realize the benefits of installing commercial solar panels through several methods. You can buy the system outright by paying cash or using financing mechanisms. Alternatively, you can lease a system or use a power purchase agreement (PPA).

Who pays for the solar system in a solar PPA?

With a solar power purchase agreement (solar PPA), you contract with a solar developer that pays for, installs, and maintains a solar system on your property. The system could include ground-mounted, rooftop, or carport solar panels (or any combination thereof), and it could include an energy storage system.

Why are solar power purchase agreements gaining popularity?

Solar power purchase agreements (PPAs) are gaining popularity because they remove the biggest barrier to entry - the price tag of solar. They can be structured with minimal upfront capital costs to the business owner.
