

Why is Con Edison charging me for solar panels?

Solar panels can offset your overall energy consumption, but they typically do not reduce your monthly demand. Demand charges cover Con Edison's cost to maintain our facilities to meet our customers' maximum energy needs. I got solar panels so I'd never have to pay another Con Edison bill ever again. Why are you still billing me?

Can I sell solar power back to Con Edison?

You can sell your extra solar power back to Con Edison, earning private solar generation credits. Your electricity generated by your solar panel travels through the supply panel to provide power to your lights and appliances. The supply panel is connected to your Con Edison meter.

How can ConEd help customers switch to solar energy?

By simplifying this process and providing substantial incentives, ConEd is making it easier than ever for customers to switch to solar energy. Switching to renewable energy can be a daunting process, but CleanChoice Energy makes it easy for customers to take the leap.

What are the benefits of net metering for Con Edison customers?

Net metering allows Con Edison customers to offset their monthly consumption with excess credits at a lower cost per kilowatt-hour than the retail rate. This can lead to significant savings on your electricity bill. However, it's important to consider your consumption patterns when enrolling in a Time-of-Use rate.

Does Con Edison offer a level payment plan?

No, Con Edison does not offer a level payment plan. Under the Level Payment Plan, Con Edison calculates an average monthly payment based on your billing history, allowing you to spread your energy costs evenly over the year.

Why can't Con Edison offer a level payment plan for net metering?

If you're using a net meter, your consumption can vary greatly from month to month and season to season. Therefore, Con Edison cannot offer a Level Payment Plan that calculates an average monthly payment to spread your energy costs out evenly over the year.

Learn about the benefits of renewable energy and how ConEd customers can choose clean energy from wind and solar--no solar panels required.

The Megawatt Block incentives are part of the state's NY-Sun initiative, a program developed by the New York State Energy Research and Development Authority ... or that isn't serviced by Con Edison. Solar customers of NYSEG or National ...
