

Who can use solar energy?

Anyone who uses energy--energy consumers--can take advantage of solar energy to power their lives. These resources, compiled by the U.S. Department of Energy Solar Energy Technologies Office (SETO), cover a wide variety of topics, from the process of choosing and installing a solar energy system, to understanding how it impacts the value of a home.

Is solar power right for You?

There's plenty to consider before you decide whether solar power is right for you. When you use a solar panel system -- also called a photovoltaic or PV system -- to produce power for your home, you won't have to buy as much electricity from the utility company, and you get the benefits of renewable energy.

Why should you buy a solar-powered home?

The solar office funded the Solar Training and Education for Professionals program, which provides tools to firefighters and fire code officials. Owning a solar-powered home can help you save on your energy bills, reduce greenhouse gas emissions, and be more energy independent.

Is Freedom Solar Power a good company?

Freedom Solar Power is generally considered a good company by its customers. Over 200 verified customers have praised their technology and installation services, reporting significant savings on energy bills after installation.
