

Container in yard with rocks and solar pump

Can you use a solar water pump without electricity?

Solar pumps are inexpensive and don't need connecting to electricity. This DIY solar-powered water feature plan uses two ceramic planters but suggests you can use just about any container that will hold a gallon of water.

Can you use a terracotta planter for a water feature?

Yes, a terracotta planter can be used for a DIY water feature. In fact, clay and terracotta look beautiful and, once glazed and treated, they do a very good job of holding water and maintaining the water level. This DIY solar-powered water feature plan uses two ceramic planters but suggests you can use just about any container that will hold a gallon of water.

How to transform a solar fountain into a mini pond?

Transform your solar fountain into a mini pond by adding aquatic plants or little stones. Water features seem to bring an element of serenity and natural beauty to your garden. The soothing sound of the water will provide a haven for birds, butterflies, and other delightful creatures.

Are solar-powered water features a good idea?

Solar-powered water features are great if you have direct sunlight that reaches your garden. However, keep in mind that they probably won't run for most of the winter and won't be suitable if the fountain is placed under cover or in an area of the garden that is heavily shaded.
