

What are EV charging stations?

Essentially, EV charging stations supply energy to recharge plug-in automobiles, including PHEV hybrids and fully electric EVs. However, there are several different types. These devices may take a number of forms, each with slightly different functions, but they all fall into one of three categories:

Do electric cars have charging stations?

As the number of electric vehicles on our roads increases, charging stations are sprouting up all over the place. Many take the form of a traditional gas station, while others are roadside chargers, like the flashy red and white Tesla charging stations.

Which EV chargers are compatible with my EV?

All EVs in the USA are compatible with Level 1 and 2 chargers. Charging stations for the home are generally Level 1, which requires very little extra equipment. At most, a special connection with a dedicated circuit may be needed to ensure the vehicle gets the full 120V.

Which charging stations have a logo?

Of the many charging stations for electric vehicles spread across America, most are Level 2 units with a fair number of DC Fast Charger units, too. The majority bear the logo of a specific business or brand, with ChargePoint managing the largest network by a wide margin.

Where can I find charging stations?

ChargeFinder is available as an app for iOS and Android. Specific city pages provide a good overview of charging stations in a particular city. Download the app from Apple App Store or Google Play. ChargeFinder will eventually also be available as apps in Apple CarPlay, Android Auto, and Android Automotive.

What is a COBE EV charging station?

Created in partnership with Powered by E.ON Drive & Clever, the COBE-designed EV charging station consists of a series of "trees" made primarily from certified wood. The tree-inspired structures feature a canopy that provides shade and protection from the elements, while also providing space for a green roof and solar panels.
